Profile

Information Technology graduate from the University of Santo Tomas, majoring in Web and Mobile Development, where I was a consistent Dean's Lister and graduated with a GWA of 1.6. I'm now a software engineer with experience across API development, software integration, AI features, and business intelligence work. I enjoy collaborating with teammates, take pride in writing code I can stand behind, and I'm always happy to learn something new along the way.

Skills

Languages: JavaScript, TypeScript, Python, PHP, Java

Frontend: React, Next.js, Vue.js, React Native, Tailwind, Bootstrap, HTML, CSS

Backend & APIs: Node.js, Express, NestJS, Laravel, GraphQL

Databases & Data: PostgreSQL, MySQL, MongoDB, SQLite, Snowflake, ClickHouse

DevOps & Homelab: Docker, Proxmox, TrueNAS, Self-Hosting, AWS S3, Firebase

Tools: Git, Postman

Soft Skills

Interpersonal Skills, Adaptability, Team Oriented, Management

Education

Bachelor of Science in Information Technology, University of Santo Tomas

2019 – 2023

Specializing in Web and Mobile Development (GWA: 1.6)

Work Experience

MediaJel

L2 Software Engineer
Aug 2023 – present | Walnut Creek, US

- Developed and maintained full-stack features end-to-end, contributing to both front-end interfaces and back-end services that power core product functionality.
- Designed, built, and maintained APIs within a microservice architecture, supporting key product features and enabling smooth communication between systems.
- Handled software integrations to connect internal platforms with third-party services, ensuring data and workflows move seamlessly between tools.
- Implemented tag integrations to support tracking, analytics, and data collection across web properties.
- Built AI features end-to-end using Vercel's AI SDK, including a context-aware chatbot powered by tools that pull in client-specific information.
- Worked on business intelligence tasks, writing SQL queries and shaping data into structured formats to produce reports that support decision-making.
- Gained hands-on experience with ad technology platforms like Google Ads and Nexxen, along with Salesforce, supporting campaign setup, management, and troubleshooting.

Homelab & Self-Hosting

Personal Infrastructure & Self-Hosted Services

- Run a Proxmox host with multiple VMs and LXC containers for self-hosted services and isolated development environments.
- Maintain a TrueNAS server with ZFS pools for network-attached storage, scheduled snapshots, and automated backups.
- Deploy self-hosted apps with Docker and Docker Compose, managing reverse proxying, networking, and updates.
